Beyond PoE: Delivering Power over Long Reach Ethernet

CLEER (Coax Leveraged Ethernet Extended Reach) switches are based on Phybridge's proven PoLRE® (Power over Long Reach Ethernet) technology.

EC10 is a 10 port managed Ethernet over Coax switch that transforms existing proven reliable COAX infrastructure into an IP path with power; ideal for IP Cameras. CLEER switches are designed specifically to enable easy migration from Analog to IP cameras without disrupting the Data LAN.

## Environmental Information

### Waste Electrical and Electronic Equipment – WEEE

The WEEE (Waste Electrical and Electronic Equipment) legislation aims to raise the level of recycling of electrical and electronic equipment and to encourage designers to create products with recycling in mind.

The EC10 + EC-LINK + EC4 and associated equipment (Power supply, etc.) that you bought have required the extraction and use of natural resources for their production. They may contain hazardous substances that could impact health and the environment.

In order to avoid the dissemination of those substances in our environment and to diminish the pressure on the natural resources, we encourage you to use the appropriate take-back systems. Those systems will reuse or recycle most of the materials of your end-of-life equipment in a sound way.

The crossed-out wheeled bin symbol invites you not to dispose of WEEE as unsorted municipal waste and to collect such WEEE separately.

If you need more information on the collection, reuse and recycling systems, please contact your local or regional waste administration.

You can also contact us for more information on the environmental performances of our products.
